A Bayesian method for predicting protein-protein interactions from genomic data is given in . Mass spectrometry data are widely used for understanding the peptide/protein composition of a sample, but these data are subject to many sources of variation, making Bayesian approaches to data analysis highly desirable. Bayesian methods in bioinformatics and computational ... Bayesian methods in structural bioinformatics From a Bayesian viewpoint, probability is a measure of a degree of belief, and thus probability theory is formally an extension of classic Aristotelian logic in the presence of uncertainty.
