The goals of this process (MA) include management, technical, project, product, or process implementation needs. A good internet resource covering various Measurements (metrics) and the goals of those measurements is here. Measurement and Analysis (MA) CMMI - Measurement and Analysis (MA) Process Area Data is the set of numbers or calculations gathered for a specific metric. For the TA team's metric, time to fill, the data would be the actual number of days. Each team members average number of days to fill a job would also become a part of the data set for the metric. Data integrity is vital to ensuring your metrics are accurate. Data, Metrics, and Analytics: What's the difference? To improve your data

analysis skills and simplify your decisions, execute these five steps in your data analysis process: Step 1: Define Your Questions. In your organizational or business data analysis, you must begin with the right question(s). Questions should be measurable, clear and concise. The Data Analysis Process: 5 Steps To Better Decision Making Make a line plot to display a data set of measurements in fractions of a unit ( $\frac{1}{2}$ ,  $\frac{1}{4}$ ,  $\frac{1}{8}$ ). Solve problems involving addition and subtraction of fractions by using information presented in line plots. For example, from a line plot find and interpret the difference in length between the longest and shortest specimens in an insect collection. Grade 4 »
