adaptations that maximize fitness. Charles Darwin called the ability of an organism to survive and reproduce in its specific environment. Darwin's Theory of Evolution Study Guide Flashcards | Quizlet Theory of Evolution. In his book *The Origin of Species*, Darwin presented evidence for his “descent with modification” theory, which has come down to us as the theory of evolution, although Darwin avoided the term “evolution.”. Essentially, Darwin suggested that random variations take place in living things and that the environment selects those individuals better able to survive and reproduce.
